## EDUCATION

CALIFORNIA STATE UNIVERSITY, CHICO

CHICO, CA

**BACHELOR OF SCIENCE**  
COMPUTER SCIENCE

1998 - 2002

**UNITED STATES NAVY**  
NUCLEAR ELECTRICIAN

2004 - 2008

## SKILLS

BIM DESIGN AND MANAGEMENT

DRAFTING

3D MODELING

BIM INTEGRATION

SOFTWARE DEVELOPMENT

VIRTUAL DESIGN AND CONSTRUCTION

CROSS - DISCIPLINARY COORDINATION

CONSTRUCTIBILITY ANALYSIS

VALUE ENGINEERING

MULTI-TRADE SYSTEMS INTEGRATION

PRE-FABRICATION & MODULAR DETAILING

AUTOMATED FABRICATION & CNC MACHINE

INTEGRATION

CARBON ENGINEERING & NET-ZERO

ENERGY WORKFLOWS

AUTO CAD

REVIT

NAVIS

DYNAMO

C#/.NET

FRONT END/BACK END/UI/UX DEVELOPER

## PROFILE

BIM Programming & VDC Automation Specialist with a track record of transforming AEC workflows—including cutting Amazon project timelines from two months to one week (7x efficiency gains) and architecting enterprise-scale FTI integrations that save tens of thousands dollars—per user annually. Proven ability to bridge software development (C#, Python, Java) and deep BIM workflows to drive rapid operational efficiency. Seeking to leverage advanced programming and automation to pioneer the next wave of VDC innovation.

## WORK EXPERIENCE

### FTI

#### SOFTWARE CONSULTANT | 2026 - Present

- Created a cross-platform Revit/Inventor ecosystem with shared data via a single source of truth "data warehouse."
- Template Automation Tool: Composed a utility command to re-label model data with respect to project number and site number for rapid adoption of template models. Reduced a task that previously took a team a week to complete down to less than a minute, delivering conservative estimated savings of \$24,000 per user annually.
- Type Swap Data Preservation Tool: Engineered a second utility command that safely preserves data across the type swap boundary, estimated to preserve \$22,000 per user annually.

### AMAZON

#### BIM CONSULTANT | 2021 - 2025

- Net Zero Carbon Framework: Built a Revit-based calculation system enabling multi-model aggregation and granular parametric control at the material and element levels. Included manual override capabilities for any attribute-based calculation to seamlessly match external carbon tools within 1% error.
- Software Integration & Automation: Built custom C# add-ins and integrated dRofus and ArcGIS, achieving 7x efficiency gains. Established bidirectional data synchronization (round-tripping) between Revit and dRofus for Kit of Parts workflows, while guiding teams in exploring generative and procedural design.
- Workflow Standardization: Authored step-by-step procedures, diagrams, training videos, and proof-of-concept demos that equipped BIM teams to adopt efficiency-driving workflows.

### BIM TECHNOLOGY LEAD

#### MICRODESK | 2018 - 2021

- BIM Integration R&D: Documented and deployed standardized workflows across diverse toolsets to resolve client consistency and efficiency challenges, data migrations, etc..
- Programmed parameter functionality for their BIM Rx Revit add in as Jr. Developer.

### BIM ELECTRICAL LEAD

#### NAC | 2015 - 2018

- Managed a modeling team to deliver major Washington schools, including the state's largest high school, engineering fully parametric electrical standards and live load calculation templates.
- Engineered electrical standards, templates, and internal tools enabling live load calculations via fully parametric families, tags, and schedules for precise complex designs.

### BIM MANAGER

#### ROSENDIN ELECTRIC | 2010 - 2015

- Implemented Engineering's BIM standard
- Ran diverse portfolio of Design projects fully leveraging BIM (Including single line diagrams connected directly to our model)
- Data Centers, NASA, Healthcare, High Rise Condos and hotels, Modeled the award winning LA Community College Bookstore fully enabling the Design team to leverage BIM including Photometrics, heat maps, and other such lighting calc tools utilizing the Revit model.

#### BLU HOMES - BIM FACTORY COORDINATOR | 2014 - 2015

#### TITAN AEC - BIM CONSULTANT | 2009 - 2020

#### CHRISTIANSEN GROUP - BIM MANAGER | 2007 - 2010
